EXPERIENCE

Frontend developer — 2022-Present

Doing projects that help me apply what I have learnt, challenge me to improve by implementing best practices and learning new things with every new project. Mostly from freelance work from client.

PROJECTS

Here are some projects I have done:

E-Portfolio

Github

EDUCATION

ALX Africa Software Engineering Programme

This is a Full Stack Developer course. It covers both the Front-end and the Back-end of Web Development.

Tech Stack includes: Bash, C and JavaScript among many others.

SOFT SKILLS

- Communication: For the team and customer to be to be more than pleased with results, I always communicate effectively.

- Versatility: I am able to learn and adopt new technologies that a company uses as it helps me learn new things

- Enthusiastic: There is always something to learn from almost everyone.

- Result-orientated: Research, learn and implement. Learning never stops and sometimes to get things done I have to learn new strategies or tools.
